TOWARDS HIGHER TQ!

WHAT'S TQ, TECHNOLOGY QUOTIENT?

TQ is not an Apt Intelligent Quotient (IQ), Emotional Quotient (EQ) and now Technology Quotient (TQ). Technology quotient represents a person's ability to adapt to and integrate technology as compared to the statistical norm or average for their age, taken as 100.

We can understand the value of IQ and EQ in projecting the potential for a child's success. And while the perfect combination of IQ and EQ may be in question, book smarts and street smarts are always high on the wish list. But what about technology?

The ability for the student and the teacher to understand, embrace and assimilate technology will be a defining aspect of their lives as we speed into the future. And in many instances, this techno-ability will drive achievement and success. In the final analysis, we are increasingly defined by technology and our active participation in everything from Smartphone to Facebook and more.

Technological innovations are arriving faster and faster – becoming less an option and more an imperative. As this reality unfolds upon us, the value of TQ may emerge as a core determinate of success in this crazy place we call the future.

The TQ Matrix & the 5 Essential Components – The inevitable components of Tech Quotient that enriches our lives, everyday, in every way!

Experience Technology!

INFRASTRUCTURE

Kram Infracon

A 3D architectural rendering of a modern building facade. The building features a dark grey upper section with a prominent white logo and name. The logo consists of three stylized, overlapping curved shapes resembling a wing or a stylized 'K'. Below the logo, the words 'KRAM' and 'INFRACON' are stacked in a bold, sans-serif font. The lower portion of the building is a glass curtain wall with a grid pattern, reflecting the sky and clouds. The sky is bright blue with scattered white clouds. The overall style is clean and professional.

NEW CHANDIGARH

Known for its Modern layout
Chandigarh

Chandigarh, with covering about 28,000 acres is India's first planned city and is known for its layout, which was designed for the people. It has a great history — American architect, Albert Mayer laid out the original plan and design but later, a lot of the buildings were designed and executed by French architect, Le Corbusier.

I found that whatever Paramount has committed is actually presenting reality. And when I say it's the reality, I can see the lush green park..., I can see huge club..., I can see great swimming pool with a wave..., I can see tennis court..., and I can see the villa in a fantastic location where in the backside I can see a lush green putting golf course..., I can see the rooms within the villas that they have designed is very spacious.

Protect your phone. Grab a GermiShield ...**NOW!**

Once GermiShield is properly applied, the active ingredient kills immediately the pathogens (GERMS, BACTERIA) and forms a protective and invisible layer on the phone surface and becomes an integral part of the phone surface, sustaining its mode of action. The ability of GermiShield protective coating wipes to electrostatically and covalently bond to phone surface, thus rendering the substrate active against these non-health organisms.

Directions for use:

- Clean your phone and its cover with a clean tissue/cloth to remove dust.
- Tear off pack from any side & pull out the wipe.
- Gently wipe over the phone and its cover on all sides and wait until dry.

GermiShield can also be used on:

Studies have found serious pathogens on cell phones, including Streptococcus, MRSA and even E. coli. ... When toilets flush, they spread germs everywhere, which is how phones end up with fecal bacteria like E. coli.

GermiShield kills & protects up to 99.99% of germs of a phone using our non-toxic CSIR-IITR tested technology.

Aarogya | Savram Foundation

Scaling Up with the best form of manure of sustainability!

#democratizinghealthcaretilllastmile #aarogya #preventivehealthcare

Why?

The concept of Preventive Healthcare and Early detection of Cancer is merely theoretical in India and Social development demands for economic backbone to keep fuelling the grass root change.

How?

3A's - Awareness | Accessibility | Affordability - Investing in holistic approach for community development for enabling them to self drive and self avail the services

What?

Converging Healthcare, Livelihood, Sanitation and Nutrition to establish strong foundation for a sustainable mission for change

What More?

With the new Anthropocene era of Artificial Intelligence driven fast moving world towards transparency and digitalization, we are creating, connecting and building a nest of co-existence for both the Impact creator and Impact beneficiary.
